Subject: Microsoft Settlement

Dear Sir/Mme:

I am very disappointed that the DOJ appears to be wimping out in its treatment of Microsoft, to the detriment of us all. The settlement proposed by the DOJ fails to address many important issues, and promises to extend Microsoft's ability to abuse their power as a monopoly to destroy current and potential competitors, forcibly extract revenue from users, and weakening US-based software companies generally vis a vis foreign software developers.

I urge you to reconsider, and to listen carefully to the position of those states which disagree with the settlement proposed by the DOJ.

Thank you,

David W. Sloyer
